

# OPEN ACCESS

**DOTTORATO DI RICERCA IN INGEGNERIA ELETTRICA, ELETTRONICA  
E DELLE COMUNICAZIONI.**

## All you need to know about research data management and Open Access PUBLISHING

A cycle of 5 seminars for PhD students

Open Science is increasingly referred to as the “Science for the Future” and the “Future of Science”. By making science more accessible - via Open Access publishing and proper Research Data Management - Open Science makes the scientific process more inclusive and the outputs of science more readily available and relevant for society.

Training in Open Science will allow PhD candidates to prepare in the best way regarding their own publications - how to adhere to Open Access (OA) requirements, how to find suitable OA journals/platforms, and how to bypass predatory journals - and proper management of their data during research and at publication - by drafting a data management plan.

**Seminar 1: Introduction to RDM**  
28 May 2020 9.30 - 12.30

**Seminar 2: RDM for personal data and commercially sensitive data**  
4 June 2020 9.30 to 12.30

**Seminar 3: Publishing research outputs**  
9 June 2020 9.30 to 12.30

**Seminar 4: Writing Data Management Plans for Grant Proposals**  
11 June 2020 9.30 to 12.30

**Seminar 5: Final presentation and assessment**  
23 June 2020 9.30 to 12.30

### Lecturers

Shalini Kurapati, Open Science Fellow at PoliTO: [shalini.kurapati@polito.it](mailto:shalini.kurapati@polito.it)  
Maria Girard and Monica Margara, Open Access Team at the PoliTO Library
